

NEW!

2024 \$50 1oz. 99.95% PURE PLATINUM COIN - PtML (BULLION)

DIVERSIFY YOUR PRECIOUS METAL PORTFOLIO

Our one-ounce 99.95% pure Platinum Maple Leaf (PtML) bullion coin is a distinctive addition to your portfolio. This coin's weight, content, and purity are guaranteed by the Government of Canada. All one-ounce 99.95% pure PtML bullion coins dated 2024 will have two unique features for enhanced security—radial lines and a micro-engraved maple leaf.

ENHANCED SECURITY

Derived from the same award-winning security technology applied to Canada's \$1 and \$2 circulation coins, the PtML security feature consists of a textured maple leaf, micro engraved with laser technology on a small area of the reverse side of the coin. In the centre of this mark, visible under magnification, is the numeral "24", denoting the coin's year of issue.

Radial lines in the 2024 PtML's field have been precisely machined to within microns on the master tooling to ensure reproducibility from die to die and coin to coin. The uniqueness of the line width and pitch gives this coin a characteristic look, and creates a light-diffracting pattern that is specific to this coin.
