Diameter: 76 x 33.3 mm

Finish: Reverse Proof

Denomination: \$5

Year of Issue: 2022

Mintage: 2,000

Country of Issue: Solomon Islands

The Coin

Dinosaurs of North America feature some of the most widely known Cretaceous creatures. Made in 2oz of pure silver legal tender this coin shows a massive *Triceratops* with elbows flexed and bowed out similar to a modern day rhinoceros. A special collectible not for the faint of heart!

The 3-horned dinosaur *Triceratops horridus* lived in the Late Cretaceous period across what is now Western North America. A herbivore, the *Triceratops* is one of the largest and most formidable land animals in history. It used its horns to fend off T Rex attacks and its horny beak and shearing teeth to forage and tear tough palm fronds!
